

MONETARY FLOW MANAGEMENT POLICY IN THE ECONOMY OF UKRAINE

Today in global environment there are many relations between different individuals for monetary flows. Using of monetary flows management policy will clearly identify the main stages of monetary flows management.

Stages of monetary flows management at the macro level are selected. Scientists allocate about 10 stages that can be reduced to four basic, as most of these of stages or repeat each other, or are detailed. Thus, the main stages of the monetary flows management policy are: planning of monetary flows in the economy, the organization of monetary flows in the economy, the implementation of the monetary flows in the economy, control (monitoring) of monetary flows in the economy.

It should be noted that the stages of monetary flows management take place in the cycle, that is, when passed the fourth stage of analysts back again to stage 1.
